## Experience

### Glue Labs

May 2023 – Present

Senior Software Engineer

New Delhi, Delhi

- Hired, trained, and led an Agile team of 14+ developers to deliver scalable features in the FIFO, Glue, and xG web platforms.
- Spearheaded the migration of the frontend codebase from React to Next.js and added React Query, improving SEO, runtime performance and reducing build times.
- Contributed to full product lifecycles at GlueLabs, from ideation to scaling, across platforms such as FIFO.im, Glue, and xG.
- Conducted rigorous code reviews to enforce coding standards, enhance security, and ensure high-quality maintainable code.
- Refactored large codebases to use TypeScript and enforced best practices via ESLint, greatly improving type-safety, maintainability, and code quality.

### Glue Labs

Mar 2019 – May 2023

Software Engineer

Remote, Delhi

- Improved frontend performance by implementing list virtualization and route-based code-splitting, leading to faster render and load times.
- Led the development of core features such as authentication, user posts, comments, replies, pagination, search, infinite loading, and multiple reusable UI components.
- Built modular and reusable UI components using React class components and higher-order components in the Simpler: Consumer Finance Panel product used by the finance team at Cars24.
- Developed and integrated frontend APIs using Redux for state management, and implemented Redux Thunk for efficient handling of asynchronous data flows.
- Designed scalable, user-focused UX flows and architected frontend repositories using industry best practices to ensure long-term maintainability and performance.
- Introduced centralized global state management by integrating Redux into a complex, large-scale codebase, improving data reliability and reducing architectural complexity.

## Projects

Dashgen | *React.js, Next.js, TailwindCSS, React Query, Nest.js, PostgreSQL, LangChain, AI*

Present

- Contributed in the development of a platform that integrates with top providers like OpenAI, Anthropic, Google GenAI, Mistral AI, Groq, xAI and DeepSeek effortlessly under one roof.
- Implemented the support for file and image uploads in the chat by leveraging Langchain and added support for almost all text based file inputs.
- Refined website responsiveness, with a particular emphasis on creating a fluid mobile experience.

FIFO | *TypeScript, React.js, Redux, Redux Saga, Material UI, Nest.js, PostgreSQL, SequelizeORM*

November 2023

- Built a blogging platform to explore insights about D2C businesses, offering users real-time interactions and scalable infrastructure.
- Implemented full-stack features like posts, user profiles, infinite loading, pagination, and content search.
- Single-handedly carried out the migration of the entire codebase from Create-React-App to Next.js.

xG | *TypeScript, React.js, Next.js, React Query, Zustand*

December 2024

- Worked in an application focused on enhancing user engagement through AI-generated content.
- Built fan pages with AI-generated videos and rewards to engage customers, aiming to 3x organic traffic on the customer's profile.

## Education

University School of Information and Communication Technology

Aug. 2014 – Aug 2018

Bachelor of Technology in Computer Science

Dwarka, Delhi

## Technical Skills

**Languages:** HTML/CSS, JavaScript, TypeScript, GraphQL, SQL, Python

**Developer Tools:** VS Code, Git, GitHub, JIRA, BitBucket

**Libraries/Frameworks:** TailwindCSS, React.js, Redux, React Query, Next.js, Remix, React Native, Nest.js
